Summary

Proficient in **Java OOPs, JDBC, MySQL, and Angular Full Stack Development** with strong skills in **HTML, CSS, JavaScript, and JSON**. Experienced in building **responsive, secure, and user-friendly web applications**, including **UI design, authentication, and role-based access control**. Successfully completed the **Infosys Springboard Internship in Angular Full Stack Development**, gaining hands-on experience with **Agile methodologies, sprint planning, daily stand-ups, and collaborative project delivery**. Strong foundation in **object-oriented programming, database management, and structured problem-solving** to develop scalable software solutions.

Education

Hindusthan College of Engineering and Technology, Coimbatore Nov 2022 – May 2026
Bachelor of Engineering (B.E.) in Electronics and Communication Engineering
GPA: 8.4 / 10
Coursework: Electrical Engineering, Communication Engineering, Programming Languages (Java, HTML, CSS, JavaScript), Internet of Things (IoT)

Experience

Angular Full Stack Intern (Authentication Team), Infosys Springboard Nov 2024 – Feb 2025

- Completed a real-time project focused on product authentication using AngularJS for the front-end and integrated back-end functionalities.
- Served as **Scrum Master**, leading daily stand-ups, sprint planning, and conducting meetings to ensure an Agile process with the product owner.
- Designed and implemented responsive UI components, ensuring a seamless user experience across devices.
- Gained hands-on experience with **Agile methodologies**, version control (**Git**), and **PrimeNG UI components**.

Projects

PlanNGo Hub (Authentication Team)

- Developed and implemented authentication features, including the homepage, login page, and sign-out page, ensuring secure access for users.
- Integrated JSON data authentication process using Angular, JSON, PrimeNG components, HTML, and CSS.
- Ensured seamless access to user authentication features, supporting secure login, registration, and role-based access control for the platform.
- **Tools Used:** HTML, AngularJS, JSON, PrimeNG

Attendance Management System (Java, JDBC, MySQL)

- Built a Java-based system to record and track student attendance with MySQL integration.
- Implemented CRUD operations using JDBC and applied OOPs concepts for modular design.
- Designed database schemas and generated attendance reports to ensure accuracy and efficiency.

Certificates

- **IBM Career Guidance – Java** [Link](#)
- **IBM Career Guidance – RDBMS** [Link](#)
- **Infosys Springboard – AngularJS** [Link](#)
- **Infosys Springboard – Web Development** [Link](#)
- **Infosys Springboard – Bootstrap 4** [Link](#)

Technical Skills

- **Frontend Technologies:** HTML5, CSS3, JavaScript, AngularJS, PrimeNG
- **Backend & Programming:** Java (OOP Principles), JDBC, JSON
- **Database:** MySQL, RDBMS (Relational Database Management Systems)
- **Tools & Methodologies:** Git (Version Control), Agile (Scrum)
